Use Case 1 – Navigate via Primary Navigation Links(Landing Page)

- Use Case Name: Access Site Sections via Top Navigation
- **Primary Actor**: Visitor (Recruiter, Hiring Manager, Peer)
- Use Case Story: This use case allows a visitor to navigate to major sections of Prabu's digital portfolio using the top navigation bar, enabling seamless discovery of key information.
- **Trigger**: Visitor clicks on a navigation link on the Landing Page (Home, Projects, Product Demo, About Me, Contact)
- Pre-Condition: The user has accessed the portfolio via a modern browser
- **Post-Condition**: The system navigates to the selected section smoothly

Primary Flow

Title: Visitor navigates to the selected portfolio section using top navigation

Actor Action	System Response
Visitor clicks on a hyperlink (e.g., "Projects") (Refer Wireframe 1) This is a second of the content of	The system highlights the active menu link, scrolls or navigates to the "Projects" section of the portfolio page (anchor or route-based navigation).
Visitor clicks on another section (e.g., "About Me")	System loads or scrolls to the selected section; updates browser hash/URL if applicable.
Visitor continues exploring via navigation links	System ensures fast, responsive switching between sections without page reload.

Alternate Flow 1 (AF1): Section Not Found

Actor Action	System Response
Visitor clicks a navigation link	System displays a toast message or error text: "Section currently unavailable. Please try again later."

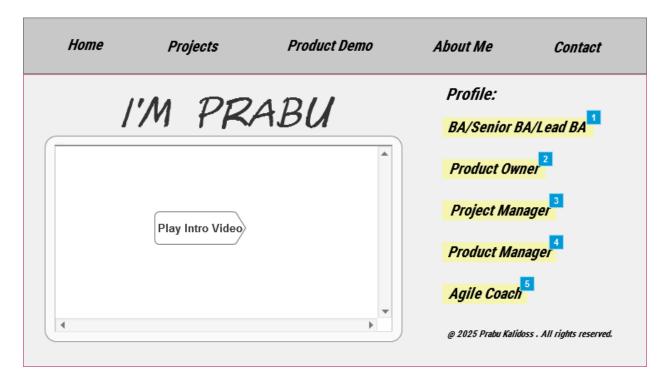

Exception Flow 1 (EF1): Link Fails to Load

Actor Action	System Response

Visitor clicks on a link, but
nothing happens(Refer
Wireframe 2)

The System shows a fallback message or redirect link. Optionally logs the event for troubleshooting.

Use Case 2 – View Case Study and Power BI Visuals (Projects Page)

- Use Case Name: Access Portfolio Case Studies and Power BI Visuals
- **Primary Actor**: Visitor (e.g., Recruiter, Hiring Manager, Peer)

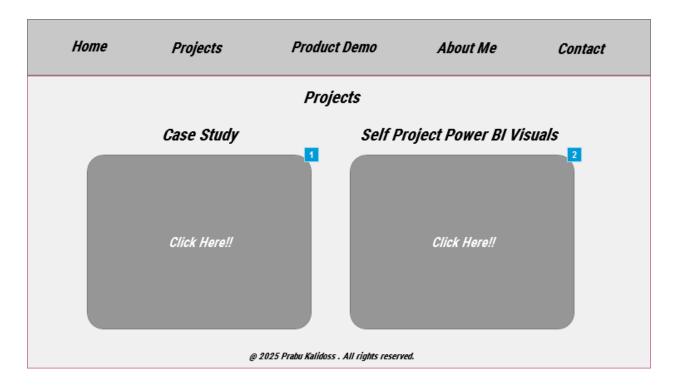

- **Use Case Story**: This use case allows a visitor to explore Prabu's portfolio by clicking on interactive elements like "Case Study" and "Self Project Power BI Visuals," helping them assess skills and documentation depth.
- **Trigger**: Visitor clicks on "Click Here!!" button under either "Case Study" or "Self Project Power BI Visuals" on the Projects Page
- Pre-Condition: Visitor has successfully navigated to the Projects Page
- **Post-Condition**: System displays the selected project content in a new tab or embedded viewer

Primary Flow

Title: Visitor explores project deliverables through interactive links

Actor Action	System Response
Visitor clicks the "Click Here!!" button below "Case Study" (Refer Wireframe 1)	System opens the Case Study document (e.g., PDF or webpage) in a new browser tab
Visitor clicks the "Click Here!!" button below "Self Project Power BI Visuals"	System opens the embedded Power BI visuals/dashboard in a new browser tab or iframe
Visitor returns to Projects Page	System maintains previous scroll position and page state

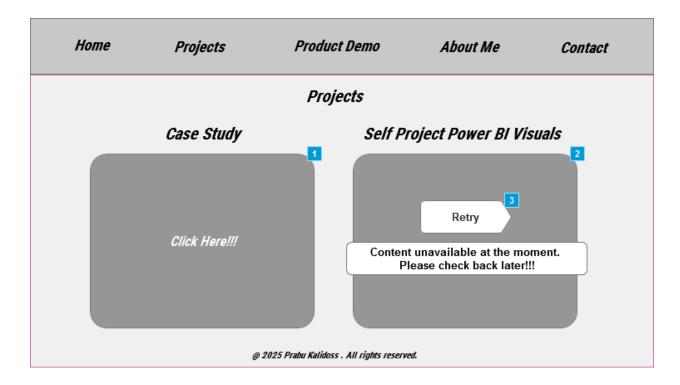

Wireframe 1_Projects Page:

Field Name	Field Type	Content	Required Field?	Min. Char.	Max Char.	Notes
Click Here(Case Study)	Hyperlink	NA	Yes	NA	NA	On click, the system displays the Case Study pdf pop up in the same window, else displays the error to retry
Click Here(Self Projects Power Bl Visuals)	Hyperlink	NA	Yes	NA	NA	On click, the system displays the Self Projects Power BI pdf pop up in the same window, else displays the error to retry

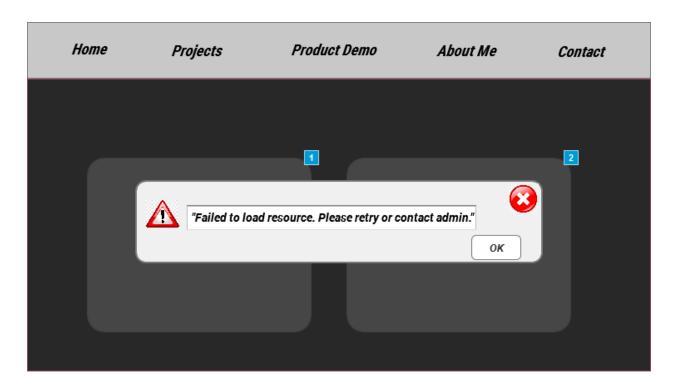

Alternate Flow 1 (AF1): Document temporarily unavailable

Actor Action	System Response
Visitor clicks on a link and the document fails to load or returns 404(Refer Wireframe 2)	System displays an inline error message: "Content unavailable at the moment. Please check back later."

Exception Flow 1 (EF1): Broken Link or No Internet

Actor Action	System Response
Visitor clicks but experiences no response due to a broken/missing link or internet issue.(Refer Wireframe 3)	System shows fallback pop-up: "Failed to load resource. Please retry or contact admin."

Use Case 3 – View Product Demo (Product Demo Page)

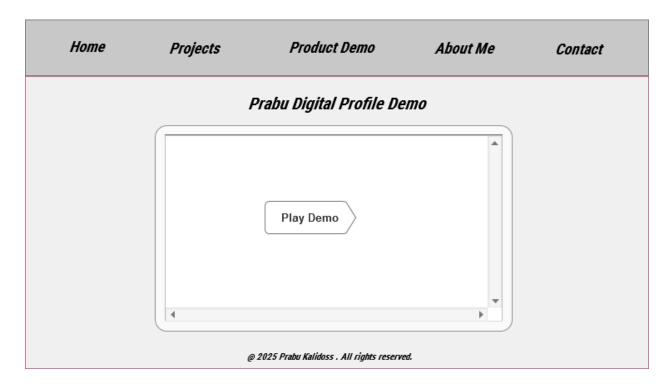

- Use Case Name: View Product Demo
- **Primary Actor**: Visitor (Recruiter, Hiring Manager, Peer)
- **Use Case Story**: This use case allows the visitor to watch an embedded Prabu Digital Profile product demo video from the Product Demo page, enhancing understanding of Prabu's communication and presentation style.
- Trigger: Visitor clicks on the "Play Demo" button
- **Pre-Condition**: Visitor has successfully navigated to the Product Demo page
- **Post-Condition**: System plays the video within the frame or informs the visitor that the video is unavailable and offers a retry

Primary Flow

Title: Visitor successfully views the Product Demo video

Actor Action	System Response
--------------	-----------------

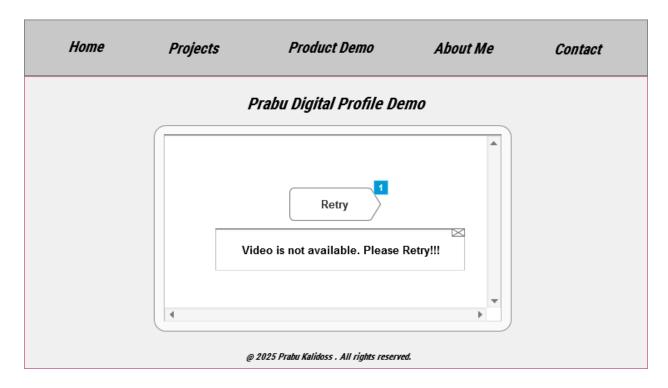

Visitor clicks "Play Intro Video" button (Refer Wireframe 1)	System launches the inline frame and loads the embedded YouTube video
Video loads and begins playing	System hides the Play button and displays the video properly within the designated section
Visitor watches the video within the same page	System ensures video controls are available (play, pause, full screen) for user interaction

Alternate Flow 1 (AF1): Video Unavailable

Actor Action	System Response
--------------	-----------------

Visitor clicks "Play Demo" button	System detects that the video cannot be loaded (e.g., no embed link, video removed)
	System displays a message box: "Video is not available. Please Retry!!!" (Refer Wireframe 2)
System shows a "Retry" button	Awaiting user interaction to attempt to reload the video again

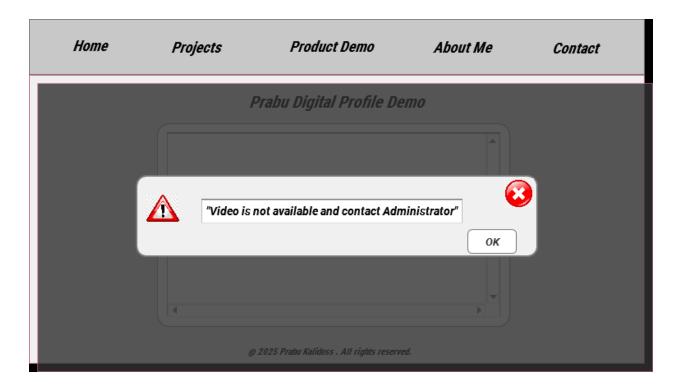

Alternate Flow 2 (AF2): Retry Successful

Actor Action	System Response
--------------	-----------------

Visitor clicks the Retry button	System rechecks video availability and successfully loads the video
	Inline frame reappears with the video, error message is removed, and Play/Retry button is hidden

X Exception Flow 1 (EF1): Persistent Playback Failure

Actor Action	System Response
Visitor clicks Retry but the video still fails(Refer Wireframe 3)	System continues to display the error message: "Video is not available. Please contact administrator."
Visitor clicks the Close button on the error pop-up	System closes the pop-up and keeps the visitor on the Product Demo page with the Retry button visible

Use Case 4 – View Self Introduction Video (About Me Page)

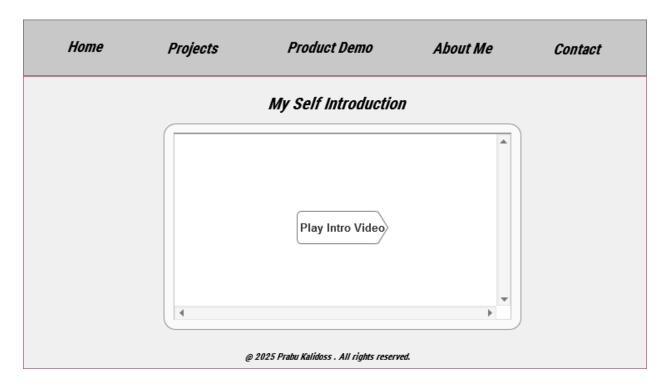

- Use Case Name: View Self Introduction Video
- **Primary Actor**: Visitor (Recruiter, Hiring Manager, Peer)
- **Use Case Story**: This use case allows the visitor to watch an embedded self-introduction video from the About Me page, enhancing understanding of Prabu's communication and presentation style.
- Trigger: Visitor clicks on the "Play Intro Video" button
- Pre-Condition: Visitor has successfully navigated to the About Me page
- **Post-Condition**: System plays the video within the frame or informs the visitor that the video is unavailable and offers a retry

Primary Flow

Title: Visitor successfully views the Self Introduction video

Actor Action	System Response
Visitor clicks "Play Intro Video" button (Refer Wireframe 1)	System launches the inline frame and loads the embedded YouTube video

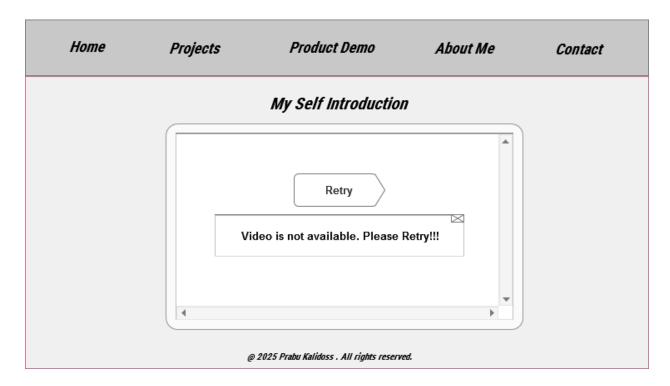

Video loads and begins playing	System hides the Play button and displays the video properly within the designated section
Visitor watches the video within the same page	System ensures video controls are available (play, pause, full screen) for user interaction

Alternate Flow 1 (AF1): Video Unavailable

Actor Action	System Response
Visitor clicks "Play Intro Video" button	System detects that the video cannot be loaded (e.g., no embed link, video removed)

	System displays a message box: "Video is not available. Please Retry!!!" (Refer Wireframe 2)
System shows a "Retry" button	Awaiting user interaction to attempt to reload the video again

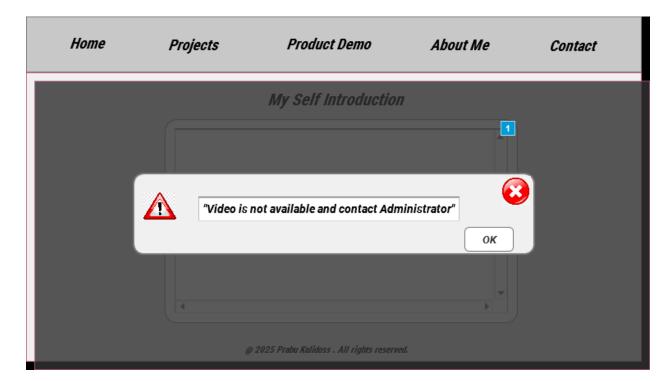

Alternate Flow 2 (AF2): Retry Successful

Actor Action	System Response
Visitor clicks the Retry button	System rechecks video availability and successfully loads the video

Inline frame reappears with the video, error message is removed, and Play/Retry button is hidden

X Exception Flow 1 (EF1): Persistent Playback Failure

Actor Action	System Response
Visitor clicks Retry but the video still fails(Refer Wireframe 3)	System continues to display the error message: "Video is not available. Please contact administrator."
Visitor clicks the Close button on the error pop-up	System closes the pop-up and keeps the visitor on the About Me page with the Retry button visible

Use Case 5 – View Contact Information (Contact Page)

- Use Case Name: View Contact Information
- **Primary Actor**: Visitor (Recruiter, Hiring Manager, Peer)
- Use Case Story: This use case allows a visitor to view Prabu's contact details such as phone number, email, and LinkedIn portfolio links, enabling easy follow-up for professional opportunities.
- Trigger: Visitor clicks the Contact link from the navigation bar
- Pre-Condition: Visitor has already accessed the digital portfolio through a modern browser
- Post-Condition: System displays the Contact Page with complete, static contact details

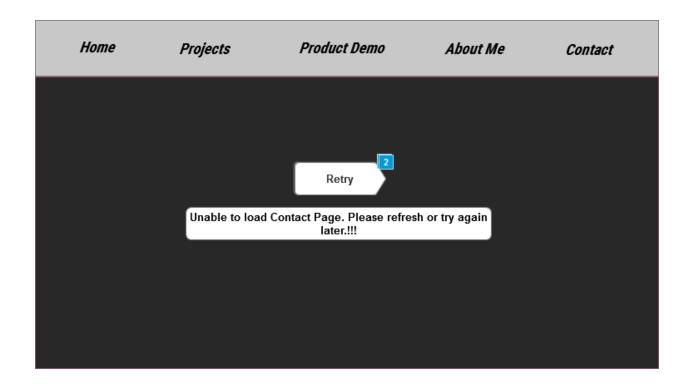

Primary Flow

Title: Visitor views static contact information

Actor Action	System Response
Visitor clicks the "Contact" hyperlink (Refer Wireframe 1)	System loads the Contact Page and displays full contact details: address, phone, email, LinkedIn links
Visitor reads or copies contact details	System maintains page state with no interaction required

Home	Projects	Product Demo	About Me	Contact
		My Contact Details:		
	Services & Po	Vadaperumbakkam, Chennai - 600060, Tamil Nadu 764300 ☑ gideonpra LinkedIn: My Portfolio ortfolio: linkedin.com/s 0559253381839497ab	services/page/	
	a a	2025 Prabu Kalidoss . All rights reserv	ved.	

Actor Action	System Response
Visitor clicks the "Contact" link (Refer Wireframe 2)	System fails to load content due to broken link or hosting issue
Visitor remains on a blank or partial page	System shows fallback message: "Unable to load Contact Page. Please refresh or try again later."

Use Case 6 – View BA Portfolio (BA/Senior BA/Lead BA Page)

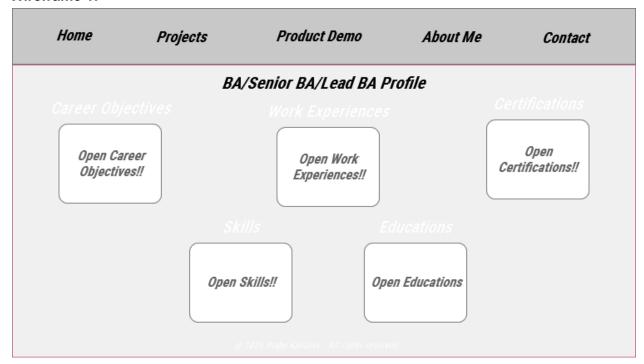

- Use Case Name: View BA Portfolio
- **Primary Actor**: Visitor (Recruiter, Hiring Manager, Peer)
- **Use Case Story**: This use case allows a visitor to explore BA-specific documents (Career Objectives, Work Experience, Certifications, etc.) by clicking respective links. Each link opens its corresponding PDF in a pop-up window within the same page.
- Trigger: Visitor clicks on a "Open [Section]!!" link (e.g., "Open Work Experiences!!")
- Pre-Condition: Visitor has accessed the BA/Senior BA/Lead BA page from the navigation menu
- **Post-Condition**: The correct PDF is displayed in a modal or inline pop-up viewer on the same page

Primary Flow

Title: Visitor views correct PDF based on selected link

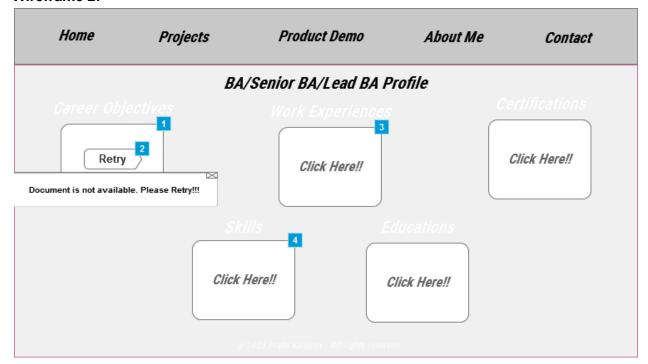

Actor Action	System Response
Visitor clicks "Open Work Experiences!!" (Refer Wireframe 1)	System opens only the Work Experience PDF in a pop-up viewer on the same BA page

Visitor clicks "Open Certifications!!"	System replaces viewer content with Certification PDF while keeping viewer context intact
Visitor continues browsing different sections	System loads each corresponding PDF in the same pop-up instance, as selected

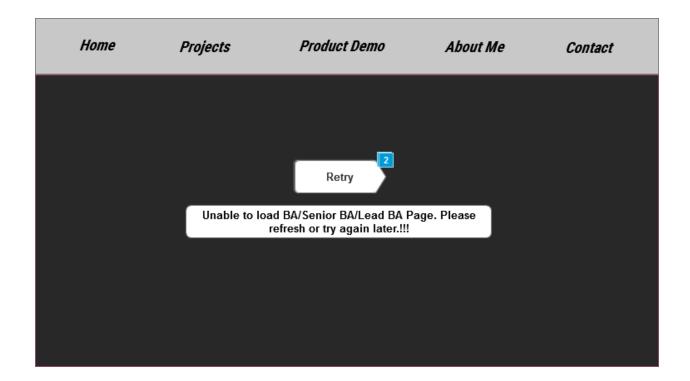

Alternate Flow 1 (AF1): Document Does Not Open

Actor Action	System Response
Visitor clicks any "Open [Section]!!" link (e.g., Work Experience)	System fails to load the corresponding PDF due to missing or broken link
	A pop-up message is displayed on the same page: "Document is not available. Please Retry!!!"
Visitor clicks Retry	System attempts to reload the selected PDF for that specific section
Retry fails again	Message remains; user may attempt again or contact admin

X Exception Flow 1 (EF1): Page Fails to Load

Actor Action	System Response
Visitor clicks "BA/Senior BA/Lead BA" from the menu	System fails to load the page due to server issue or navigation error
Visitor remains on previous screen or sees partial load	System shows fallback message: "Unable to load BA/Senior BA/Lead BA Page. Please refresh or try again later.!!!"" (Refer Wireframe 3)

Use Case 7 – View Product Owner Portfolio (*Product Owner Page*)

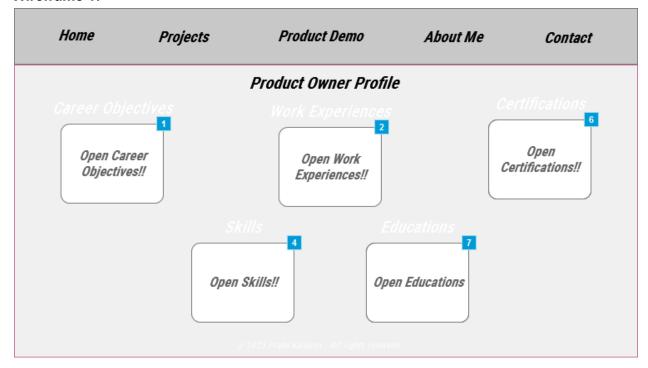

- Use Case Name: View Product Owner Portfolio
- **Primary Actor**: Visitor (Recruiter, Hiring Manager, Peer)
- Use Case Story: This use case allows a visitor to explore Product Owner-specific documents (Career Objectives, Work Experience, Certifications, etc.) by clicking respective links. Each link opens its corresponding PDF in a pop-up window within the same page.
- Trigger: Visitor clicks on a "Open [Section]!!" link (e.g., "Open Work Experiences!!")
- **Pre-Condition**: Visitor has accessed the Product Owner page from the navigation menu
- **Post-Condition**: The correct PDF is displayed in a modal or inline pop-up viewer on the same page

Primary Flow

Title: Visitor views correct PDF based on selected link

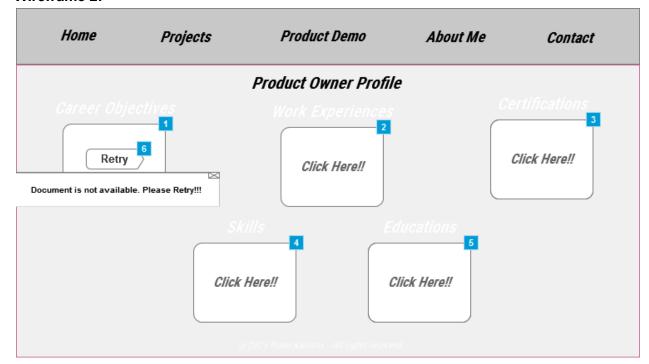

Actor Action	System Response
Visitor clicks "Open Work Experiences!!" (Refer Wireframe 1)	System opens only the Work Experience PDF in a pop-up viewer on the same Product Owner page

Visitor clicks "Open Certifications!!"	System replaces viewer content with Certification PDF while keeping viewer context intact
Visitor continues browsing different sections	System loads each corresponding PDF in the same pop-up instance, as selected

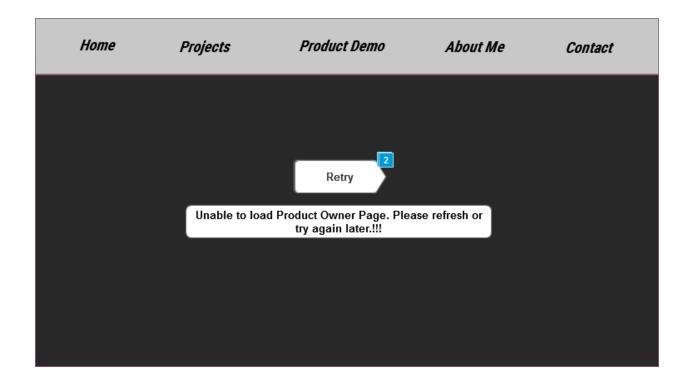

Alternate Flow 1 (AF1): Document Does Not Open

Actor Action	System Response
Visitor clicks any "Open [Section]!!" link (e.g., Work Experience)	System fails to load the corresponding PDF due to missing or broken link
	A pop-up message is displayed on the same page: "Document is not available. Please Retry!!!"
Visitor clicks Retry	System attempts to reload the selected PDF for that specific section
Retry fails again	Message remains; user may attempt again or contact admin

X Exception Flow 1 (EF1): Page Fails to Load

Actor Action	System Response
Visitor clicks "BA/Senior BA/Lead BA" from the menu	System fails to load the page due to server issue or navigation error
Visitor remains on previous screen or sees partial load	System shows fallback message: "Unable to load Product Owner Page. Please refresh or try again later.!!!"" (Refer Wireframe 3)

Use Case 8 – View Project Manager Portfolio (*Project Manager Page*)

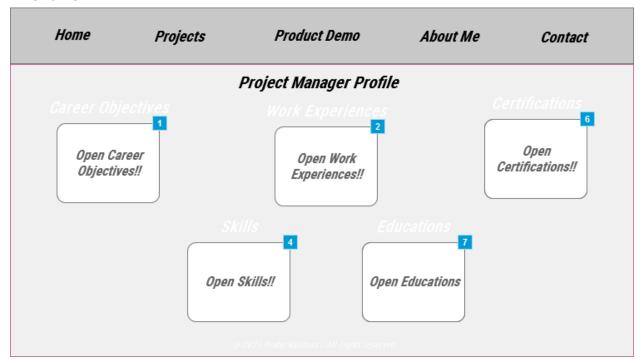

- Use Case Name: View Project Manager Portfolio
- **Primary Actor**: Visitor (Recruiter, Hiring Manager, Peer)
- Use Case Story: This use case allows a visitor to explore Project Manager-specific documents (Career Objectives, Work Experience, Certifications, etc.) by clicking respective links. Each link opens its corresponding PDF in a pop-up window within the same page.
- Trigger: Visitor clicks on a "Open [Section]!!" link (e.g., "Open Work Experiences!!")
- Pre-Condition: Visitor has accessed the Project Manager page from the navigation menu
- **Post-Condition**: The correct PDF is displayed in a modal or inline pop-up viewer on the same page

Primary Flow

Title: Visitor views correct PDF based on selected link

Actor Action	System Response

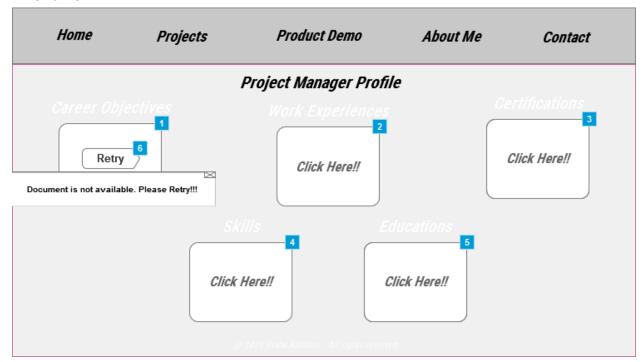

Visitor clicks "Open Work Experiences!!" (Refer Wireframe 1)	System opens only the Work Experience PDF in a pop-up viewer on the same Project Manager page
Visitor clicks "Open Certifications!!"	System replaces viewer content with Certification PDF while keeping viewer context intact
Visitor continues browsing different sections	System loads each corresponding PDF in the same pop-up instance, as selected

Alternate Flow 1 (AF1): Document Does Not Open

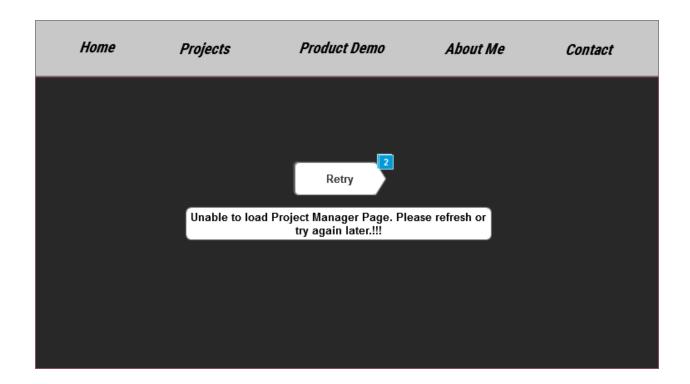

Actor Action	System Response
Visitor clicks any "Open [Section]!!" link (e.g., Work Experience)	System fails to load the corresponding PDF due to missing or broken link
	A pop-up message is displayed on the same page: "Document is not available. Please Retry!!!"
Visitor clicks Retry	System attempts to reload the selected PDF for that specific section

Retry fails again	Message remains; user may attempt again or	
	contact admin	

X Exception Flow 1 (EF1): Page Fails to Load

Actor Action	System Response
Visitor clicks "Project Manager" from the menu	System fails to load the page due to server issue or navigation error
Visitor remains on previous screen or sees partial load	System shows fallback message: "Unable to load Project Manager Page. Please refresh or try again later.!!!"" (Refer Wireframe 3)

Use Case 9 – View Product Manager Portfolio (Product Manager Page)

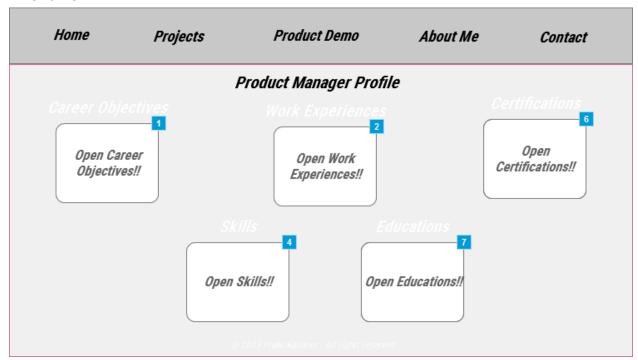

- Use Case Name: View Product Manager Portfolio
- **Primary Actor**: Visitor (Recruiter, Hiring Manager, Peer)
- Use Case Story: This use case allows a visitor to explore Product Manager-specific documents (Career Objectives, Work Experience, Certifications, etc.) by clicking respective links. Each link opens its corresponding PDF in a pop-up window within the same page.
- Trigger: Visitor clicks on a "Open [Section]!!" link (e.g., "Open Work Experiences!!")
- Pre-Condition: Visitor has accessed the Product Manager page from the navigation menu
- **Post-Condition**: The correct PDF is displayed in a modal or inline pop-up viewer on the same page

Primary Flow

Title: Visitor views correct PDF based on selected link

Actor Action	System Response
--------------	-----------------

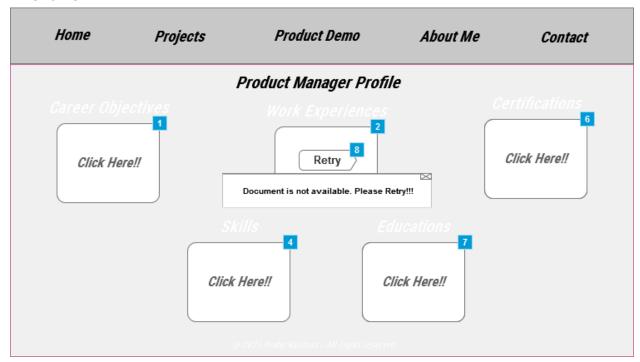

Visitor clicks "Open Work Experiences!!" (Refer Wireframe 1)	System opens only the Work Experience PDF in a pop-up viewer on the same Product Manager page
Visitor clicks "Open Certifications!!"	System replaces viewer content with Certification PDF while keeping viewer context intact
Visitor continues browsing different sections	System loads each corresponding PDF in the same pop-up instance, as selected

Alternate Flow 1 (AF1): Document Does Not Open

Actor Action	System Response
Visitor clicks any "Open [Section]!!" link (e.g., Work Experience)	System fails to load the corresponding PDF due to missing or broken link
	A pop-up message is displayed on the same page: "Document is not available. Please Retry!!!"
Visitor clicks Retry	System attempts to reload the selected PDF for that specific section

Retry fails again	Message remains; user may attempt again or contact admin

X Exception Flow 1 (EF1): Page Fails to Load

Actor Action	System Response
Visitor clicks "Product Manager" from the menu	System fails to load the page due to server issue or navigation error
Visitor remains on previous screen or sees partial load	System shows fallback message: "Unable to load Product Manager Page. Please refresh or try again later.!!!"" (Refer Wireframe 3)

Use Case 10 – View Agile Coach Portfolio (Agile Coach Page)

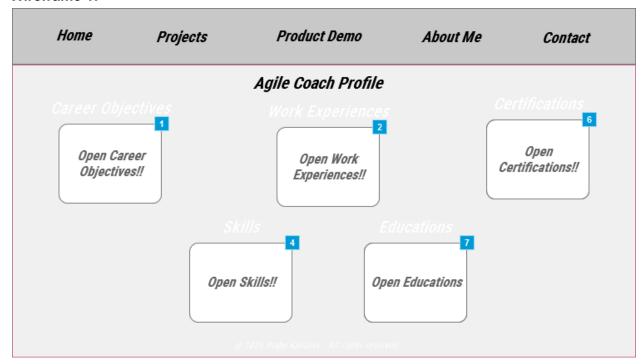

- Use Case Name: View Agile Coach Portfolio
- **Primary Actor**: Visitor (Recruiter, Hiring Manager, Peer)
- Use Case Story: This use case allows a visitor to explore Agile Coach-specific documents (Career Objectives, Work Experience, Certifications, etc.) by clicking respective links. Each link opens its corresponding PDF in a pop-up window within the same page.
- Trigger: Visitor clicks on a "Open [Section]!!" link (e.g., "Open Work Experiences!!")
- Pre-Condition: Visitor has accessed the Agile Coach page from the navigation menu
- **Post-Condition**: The correct PDF is displayed in a modal or inline pop-up viewer on the same page

Primary Flow

Title: Visitor views correct PDF based on selected link

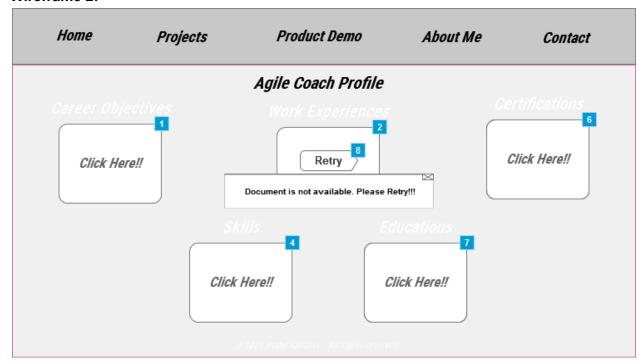

Actor Action	System Response
	System opens only the Work Experience PDF in a pop-up viewer on the same Agile Coach page

Visitor clicks "Open Certifications!!"	System replaces viewer content with Certification PDF while keeping viewer context intact
Visitor continues browsing different sections	System loads each corresponding PDF in the same pop-up instance, as selected

Alternate Flow 1 (AF1): Document Does Not Open

Actor Action	System Response
Visitor clicks any "Open [Section]!!" link (e.g., Work Experience)	System fails to load the corresponding PDF due to missing or broken link
	A pop-up message is displayed on the same page: "Document is not available. Please Retry!!!"
Visitor clicks Retry	System attempts to reload the selected PDF for that specific section
Retry fails again	Message remains; user may attempt again or contact admin

X Exception Flow 1 (EF1): Page Fails to Load

Actor Action	System Response
Visitor clicks "Agile Coach" from the menu	System fails to load the page due to server issue or navigation error
Visitor remains on previous screen or sees partial load	System shows fallback message: "Unable to load Agile Coach Page. Please refresh or try again later.!!!"" (Refer Wireframe 3)
