🧾 User Story 1 – Navigate via Primary Navigation Links *(Landing Page)*

Role	Goal	Benefit
As a	Visitor (Recruiter, Hiring Manager, Peer)	
I want to	Access various sections of Prabu's Digital Profile — including **Home, Projects, Product Demo, About Me, Contact**, and **Role-Specific Pages** (*BA/Senior BA/Lead BA, Product Owner, Project Manager, Product Manager, Agile Coach*) using the top navigation bar and hyperlinks	
So that	I can seamlessly explore relevant portfolio content and evaluate different capabilities aligned to each professional role	I can identify whether Prabu's documentation, experience, and presentation match the needs of specific project roles I'm hiring or collaborating for

✅ Acceptance Criteria

ID	Acceptance Criteria Description
AC1	The system shall display a fixed top navigation bar on the Landing Page with links to: **Home, Projects, Product Demo, About Me, Contact**, and **BA/Senior BA/Lead BA, Product Owner, Project Manager, Product Manager, Agile Coach**

AC2	When the visitor clicks on any navigation link, the system shall open the corresponding section or profile page in a **new browser tab**
AC3	The system shall apply a visual indicator (e.g., highlight or underline) to the selected navigation item upon click
AC4	Each **Role-based link** shall open only its corresponding page — e.g., clicking *Project Manager* opens only the PM page
AC5	If a section fails to load (e.g., Product Demo or Contact Page), the system shall display a fallback message:
"**Section currently unavailable. Please try again later.**"	
AC6	If a link fails silently or the target page is broken, the system shall retain the user on the Landing Page and show a banner:
"**Unable to load the selected page. Please retry or contact the administrator.**"	
AC7	The system shall support navigation compatibility across modern browsers including Chrome, Firefox, Edge, and Safari
AC8	All links shall include a **300ms delay** interaction (as per wireframe logic) before opening the new tab

🔗 Traceability Matrix

Artifact Type	Reference Description
Use Case ID	Use Case 1 – Navigate via Primary Navigation Links *(Landing Page)*
Activity Diagram	"Landing Page Navigation" Swimlane – Visitor → Landing Page → Validation → Page Renderer

Wireframe Reference	WireFrame_Self Product_"Prabu Digital Profile.docx → Sections: A1 to A10, Role-Based Navigation Notes
Interaction Logic	All links open corresponding pages with click delay; role-based routing follows "Bring to Front → Open Tab" pattern

🧾 User Story 2 – View Case Study and Power BI Visuals (Projects Page)

As a	Visitor (Recruiter, Hiring Manager, Peer)
I want to	Access Case Study and Power BI Visuals on the Projects Page by clicking each respective **"Click Here!!"** link
So that	I can review Prabu's domain expertise, data insights, and real-world documentation work to evaluate his fit for data-driven and stakeholder-facing roles

✅ Acceptance Criteria

ID	Acceptance Criteria Description
AC1	The Projects Page shall display two visual blocks or cards — one for a **Case Study PDF** and another for a **Power BI Dashboard**
AC2	When the visitor clicks **"Click Here!!"** on either item, the correct document shall open in a **pop-up viewer** or **inline frame** on the same page
AC3	The document shown shall exactly match the selected section — e.g., Case Study must not open Power BI
AC4	If the PDF or Power BI content fails to load, the system shall display a fallback message:
"Document is not available. Please Retry!!!"	

AC5	If Retry is clicked and content loads successfully, the viewer shall display it and remove the error message
AC6	If Retry fails again, the system shall persist the error message while allowing repeated attempts
AC7	The Projects Page shall open in a **new browser tab** via navigation link from the Landing Page
AC8	All clicks shall adhere to the **300ms interaction delay** (from wireframe interaction logic)

📎 Traceability Matrix

Artifact Type	Reference Description
Use Case ID	Use Case 2 – View Case Study and Power BI Visuals *(Projects Page)*
Activity Diagram	Projects Page Navigation Flow → Visitor → Section Trigger → Document Viewer or Retry Message
Wireframe Reference	`WireFrame_Self Product_"Prabu Digital Profile.docx` → Section 1.1.6 – Projects Page (CaseStudyButton, SelfStudyButton)
Alternate & Exception Flows	AF1 (Unavailable), AF2 (Retry Success), EF1 (Retry Fails Again)

Thanks for the nudge, Prabu — you're absolutely right, and I appreciate your clarity 💡 Let's formally lock in **User Story 3 – View Product Demo (Product Demo Page)** in your preferred format, with precise layout and gray-highlighted column headers. Here it is:

🧾 User Story 3 – View Product Demo *(Product Demo Page)*

As a	Visitor (Recruiter, Hiring Manager, Peer)
I want to	Click the **"Play Intro Video"** button on the Product Demo Page to watch Prabu's video directly in the page

So that	I can quickly assess Prabu's confidence, delivery style, and communication clarity without navigating away from the portfolio

✅ Acceptance Criteria

ID	Acceptance Criteria Description
AC1	The Product Demo Page shall display a clear **Play Intro Video** button or visual indicator (e.g., frame thumbnail with play icon)
AC2	When the button is clicked, the embedded video frame shall load **inline** within the same page (not open a new tab)
AC3	The video shall play from the embedded YouTube link defined in the wireframe interaction logic
AC4	If the video fails to load or embed, the system shall display an error modal with the message:
"**Video is not available. Please Retry!!!**"	
AC5	A Retry button shall be available in the error modal, allowing the visitor to attempt loading again
AC6	If Retry succeeds, the video shall begin playback, and the error modal shall close
AC7	If Retry fails again, the system shall persist the fallback message:
"**Video is not available. Please contact administrator.**" — with **Retry** and **Close** options	
AC8	On clicking Close, the visitor shall remain on the Product Demo page, and the Retry button shall still be accessible
AC9	The Product Demo Page shall be accessible from the top navigation bar and open in a **new browser tab** with a **300ms delay interaction**

📎 Traceability Matrix

Alternate & Exception Flows	AF1 (Video unavailable with Retry), AF2 (Retry succeeds), EF1 (Retry fails again with persistent prompt)

🧾 User Story 4 – View About Me Video *(About Me Page)*

As a	Visitor (Recruiter, Hiring Manager, Peer)
I want to	Click the **Play Introduction Video** on the About Me Page to watch Prabu's recorded self-pitch directly in the page
So that	I can understand Prabu's personality, passion, and articulation before engaging further in a recruitment conversation

✅ Acceptance Criteria

ID	Acceptance Criteria Description
AC1	The About Me Page shall display a visible **Play Introduction Video** button or frame with an embedded thumbnail
AC2	When clicked, the **YouTube video** shall play inline within the same page, without opening a new tab
AC3	Standard YouTube controls (play, pause, fullscreen) shall be accessible once playback begins
AC4	If the video fails to load, the system shall display an error message overlay:

"**Video is not available. Please Retry!!!**"	
AC5	A Retry button shall allow the visitor to re-attempt loading the embedded video
AC6	If Retry succeeds, the video shall appear within the same space and the error prompt shall close
AC7	If Retry fails again, the system shall retain the fallback message and keep the Retry and Close buttons available
AC8	If the visitor clicks Close, the system shall hide the error message and remain on the About Me Page
AC9	The About Me Page shall be accessible via the top navigation bar and open in a **new tab** with **300ms delay interaction**

📎 Traceability Matrix

Artifact Type	Reference Description
Use Case ID	Use Case 4 – View About Me Video *(About Me Page)*

Wireframe Reference	`WireFrame_Self Product_"Prabu Digital Profile.docx` → Section 1.1.8 – About Me Page → *IntroVideoDynamic Panel*
Alternate & Exception Flows	AF1 (Video unavailable), AF2 (Retry loads video), EF1 (Persistent failure with Retry + Close option)

📃 User Story 5 – View Contact Information *(Contact Page)*

As a	Visitor (Recruiter, Hiring Manager, Peer)
I want to	View Prabu's full contact information on a dedicated Contact Page, accessible via the navigation bar
So that	I can easily reach out via email, phone, or LinkedIn for potential collaboration, feedback, or recruitment opportunities

✅ Acceptance Criteria

ID	Acceptance Criteria Description
AC1	The Contact Page shall display the following details clearly: – Full Name – Email ID – Mobile Number – LinkedIn profile link
AC2	All contact info shall include semantic labels (e.g., ✉ Email, ☎ Phone) to guide the visitor
AC3	Clicking the email address shall launch the default email app (e.g., Outlook, Gmail) with the address pre-filled
AC4	On mobile devices, clicking the phone number shall open the dialer with the number filled in
AC5	Clicking the LinkedIn link shall open the profile in a **new browser tab**
AC6	If any method fails (e.g., broken link), a message shall be shown: "**Unable to access contact method. Please try again or copy manually.**"
AC7	The Contact Page shall launch from the Landing Page top nav with **300ms interaction delay**, as per standard page transition logic
AC8	The layout and fonts shall remain responsive and aligned across desktop and mobile screen sizes

📎 Traceability Matrix

Use Case ID	Use Case 5 – View Contact Information *(Contact Page)*
Activity Diagram	Contact Page Access Flow → Visitor → Navigation → Page Load → Link Actions
Wireframe Reference	WireFrame_Self Product_"Prabu Digital Profile.docx → Section: 1.1.9 – Contact Page
Alternate & Exception Flows	AF1 (Email or Phone link does not open); EF1 (All methods unavailable – fallback copy message shown)

🧾 User Story 6 – View BA Portfolio *(BA/Senior BA/Lead BA Page)*

As a	Visitor (Recruiter, Hiring Manager, Peer)
I want to	Access the BA portfolio sections (Career Objectives, Work Experience, Certifications, Skills, Education) by clicking "Click Here!!" buttons
So that	I can explore Prabu's BA-specific experience and qualifications via downloadable documentation in a focused role-based view

✅ Acceptance Criteria

ID	Acceptance Criteria Description
AC1	The BA Page shall display five clickable tiles or buttons: Career Objectives, Work Experience, Certifications, Skills, and Education
AC2	Each tile shall include a **"Click Here!!"** button clearly labeled and visually consistent with the rest of the profile
AC3	When a button is clicked, the corresponding PDF shall open in a **pop-up viewer window** or inline preview frame
AC4	Each button shall be hard-linked to a distinct PDF hosted on GitHub (as per interaction notes) and must not cross-load content

AC5	If the document is unavailable (e.g., broken link), the system shall display:
"**Document is not available. Please Retry!!!**"	
AC6	A Retry option shall be displayed if a document fails to load, and if successful, the PDF shall replace the error message
AC7	If Retry fails again, the error shall persist, and users may retry or exit the viewer
AC8	The BA Profile Page shall open via the main navigation bar or role-specific links from the Landing Page, with **300ms delay interaction** logic

---

Alternate & Exception Flows	AF1 – Document Not Available; AF2 – Retry Success; EF1 – Retry Fails Again with Persistent Message

🧾 User Story 7 – View Product Owner Portfolio *(Product Owner Profile Page)*

As a	Visitor (Recruiter, Hiring Manager, Peer)
I want to	Access the Product Owner portfolio sections (Career Objectives, Work Experience, Certifications, Skills, Education) by clicking **"Click Here!!"** buttons
So that	I can assess Prabu's experience and delivery mindset as a Product Owner, supported by structured documentation and leadership-focused skills

✅ Acceptance Criteria

ID	Acceptance Criteria Description
AC1	The Product Owner Page shall display five sections with interactive **"Click Here!!"** buttons: Career Objectives, Work Experience, Certifications, Skills, Education

AC2	Each button shall be clearly labeled and visually distinct from the section title, following the wireframe's interaction notes
AC3	When clicked, the respective PDF shall open in a **pop-up window** or inline viewer frame on the same page
AC4	All documents shall be mapped to **PO-focused versions** hosted via dedicated GitHub links — no cross-role content display
AC5	If a PDF fails to load, the system shall display a message:
"**Document is not available. Please Retry!!!**"	
AC6	On clicking Retry, the system shall re-attempt loading the content and replace the error with the viewer if successful
AC7	If Retry fails again, the fallback message shall persist with Retry and Close options available to the visitor
AC8	The Product Owner Page shall open via the top navigation bar or role-specific tile on the Landing Page, with a **300ms delay before redirection**

🔗 Traceability Matrix

🧾 User Story 8 – View Project Manager Portfolio *(Project Manager Profile Page)*

As a	Visitor (Recruiter, Hiring Manager, Peer)
I want to	Access the Project Manager portfolio content (Career Objectives, Work Experience, Certifications, Skills, Education) by clicking each **"Click Here!!"** button
So that	I can evaluate Prabu's project leadership, stakeholder coordination, and team management qualifications using structured downloadable references

✅ Acceptance Criteria

ID	Acceptance Criteria Description

AC1	The PM Page shall display five sections with clickable **"Click Here!!"** buttons: Career Objectives, Work Experience, Certifications, Skills, Education
AC2	Each button shall be visually aligned, semantically labeled, and linked to a distinct document hosted on GitHub
AC3	Clicking a button shall open the corresponding PDF in a **pop-up modal** or **inline viewer** without redirecting the user to a new tab
AC4	The document displayed shall match the selected category (e.g., clicking Certifications shall not open Career Objectives)
AC5	If the document fails to load, the system shall display an alert:
"**Document is not available. Please Retry!!!**"	
AC6	A Retry button shall be available to re-attempt loading the document; on success, the error message shall disappear and the content shall render
AC7	If Retry fails again, the fallback message shall remain persistent with both Retry and Close options visible
AC8	The PM Profile Page shall open via the top navigation menu or role-specific tile from the Landing Page, with a **300ms delay** before navigation begins

📎 Traceability Matrix

Alternate & Exception Flows	AF1 – Missing PDF; AF2 – Retry success; EF1 – Retry failure persists

🧾 User Story 9 – View Product Manager Portfolio
(Product Manager Profile Page)

As a	Visitor (Recruiter, Hiring Manager, Peer)
I want to	Click on distinct tiles to access Product Manager-focused PDFs such as Career Objectives, Work Experience, Certifications, Skills, and Education
So that	I can review Prabu's product management qualifications, delivery maturity, and role adaptability using concise, downloadable artifacts

✅ Acceptance Criteria

ID	Acceptance Criteria Description
AC1	The Product Manager Page shall display five clickable sections: Career Objectives, Work Experience, Certifications, Skills, and Education
AC2	Each section shall contain a prominent **"Click Here!!"** button to trigger the relevant document
AC3	Upon click, the associated PDF shall open in a **popup viewer** or an embedded display frame on the same page
AC4	The system shall ensure each PDF is mapped to **PM-specific content** hosted on GitHub (not reused from other roles)
AC5	If a document fails to load, a visible error message shall appear:
"**Document is not available. Please Retry!!!**"	
AC6	The Retry button shall allow the visitor to reload the content; on success, the viewer shall replace the error
AC7	If Retry fails again, the fallback message shall remain, and the visitor may choose to Close or try again

AC8	The Product Manager Page shall be reachable from the Landing Page via navigation bar or role tile, and all interactions shall include the **300ms delay logic** for consistency

---

Alternate & Exception Flows	AF1 – Missing PDF document; AF2 – Retry success; EF1 – Retry fails again with persistent message

🧾 User Story 10 – View Agile Coach Portfolio *(Agile Coach Profile Page)*

As a	**Visitor (Recruiter, Hiring Manager, Peer)**
I want to	Click on dedicated tiles for **Career Objectives, Work Experience, Certifications, Skills, and Education** to view Agile Coach-related documents

So that	I can assess Prabu's agile mindset, facilitation experience, and cross-team coaching credibility through targeted, accessible PDF content

✅ Acceptance Criteria

ID	Acceptance Criteria Description
AC1	The Agile Coach Page shall present five clearly labeled tiles or cards: **Career Objectives, Work Experience, Certifications, Skills, Education**
AC2	Each tile shall feature a **"Click Here!!"** button, visually distinct and consistent with the page design
AC3	Clicking a button shall open the corresponding PDF in a **popup viewer** or an **embedded frame** (without redirecting to a new tab)
AC4	Each button must load **Agile Coach–focused documents** from GitHub-hosted links, not re-used from other role pages
AC5	If a document fails to load, the user shall see the fallback message:
"Document is not available. Please Retry!!!"	

AC6	A Retry button shall be offered, which on success shall reload the PDF and dismiss the error prompt
AC7	If Retry fails again, the fallback message shall persist with Retry and Close options visible
AC8	The Agile Coach Page shall be reachable via the Landing Page top nav or role tile, and shall open in a **new browser tab** after a **300ms delay**
